

Workspace Exporter for iManage

A simple way to export Workspaces/Folders/Documents from iManage 10.x

Professional Services firms leveraging iManage's document management system require a simple and effective way to export Workspaces/Folders/Documents from iManage 10.x.

Today, there is no way to easily export a Workspace and all its contents. With GDSI's Workspace Exporter for iManage, users can save all contents to one location.

KEY FEATURES

- Work 10.x Web Integration
- User can select one Workspace to export right from the web client
- Options include:
 - ◆ Create empty folder
 - ◆ Convert documents to PDF
 - ◆ Export a CSV file with all document profile information of exported documents
- Shortens folders and document names to conform to the Windows NTFS standard for sizing
- Exports to a central Windows network share
- Logging available for failed exports

PRICING

\$50/user plus 20% annual maintenance, first year up front

Additional setup fees may apply should the firm require a custom setup

TECHNOLOGY PLATFORM

- Work 10.3.x or newer
